## Quarterly Magazine

### July edition

## Foreword

Simplicity in every sphere is caution for a working women, where she has a comparision with fashion designers , who is better dressed

And more than work, the invaders of office are interested in spoiling her looks

So that dishevelled , fat , unhealthy woman should give them money for designing better looks for themselves

So, our July edition aims at pointing out Society and industry flaws

Divine Publishers

## Jewellery

The goldsmiths have had their last laugh while gold prices at international level have been falling despite the heat of fake and impure jewellery mixed with disproportionate ratio of other metals .

The so called Imitation jewellery is the next big wave in India now, as designs and looks of stone studded artificial jewellery cannot match the goldsmith's aspirations.

The famous Kolar mines of Karnataka is the major destination for cold blooded murder as the British women might be jealous of word "Royal" as tradition of

India might surpass their expectations of luxury

The inherent desire to steal gold and the loss of innocent Indian lives might be their motive

# Sports

The sports in India should take a backseat now. As the sportsman spirit of people has died down in such a way that innocent lives are burned down.

Every game is not the same and winning every time is not a compulsion .

International matches have been a thing of past where IPL (Indian Premier League) has skewed the zeal of players

IPL teams include people from all countries in one team and inter-state fight is there through teams owned by Bollywood celebrities.

Lets understand again, Mumbai fights with Hyderabad . Mumbai and

Hyderabad teams owned by Bollywood and the players are auctioned. All countries participate and Mumbai and Hyderabad teams all have players from all countries fighting with each other for crown

# Dissecting the financial sector

The financial sector of the country is in deep shock due to century of mismanaged finances .

The accountants have been looting the companies on the name of specialities in calculation of deep transactions of company.

The balance sheet of company might indicate a bankruptcy due to ire of the accountant working as the competitor of the firm.

The identity of an accountant handling a software should be as clear as glass so that the company owner knows that information is not passed out to

competitor or maybe the accountant himself is having a competing firm of which the owner is unaware of.

# Automobiles

The diesel, petrol and gas have got a tough competition from electric vehicles

The only question that comes to mind is the electric vehicles battery is charged for how long to carry a journey of maybe 10 kms.

And the lack of knowledge of the car mechanics who might change the fuel pump during servicing of car so as to create confusion in market.

All cars don't support diesel and petrol variants and the energy efficiency is totally different in case of gas and electric vehicles.

Even the mafia might cheat auto for LPG gas instead of CNG or LNG , so as to choke the fuel tank causing disruptions in automobile sector.

# Farm Agitation

The farmers have been demanding more MSP(Minimum Support Price) for the produce. Even milching farmers are a part of agitation

The sugar cost and cotton cost has gone up. As sugar cane fields in Uttar Pradesh were taken up by goons and cotton appears gold to them .

The villagers who have been in luxury cars when we donot have money for bus ticket indicates British Imperialism in India.

The traitors of a country if pass on a buck and information to outsiders , it leads to vacuum in a country . This can

be a cause of theft and insult that these women put on us earning women.
